

NEW – Creasing/Perforating Machine GPM 450 Speed

Our latest development is the new GPM 450 SPEED following on from the successful GPM 450 SA, the new SPEED version provides a unique auto friction feed system enabling faster and higher output of creased and perforated sheets.

- reliable friction feeding with speed up to 2500 A4 sheets/A4
- large work table and working width suitable for A2 paper formats
- touch screen display for easy setting of distance and number of creases
- possibility of programme storage
- two widths of fine creasing channels
- easily exchangeable creasing and perforating tools
- high-quality anvil perforation
- angle-adjustable paper stops on feeding table
- adjustable feed pressure
- telescopic feed table
- batching

- Working width 100-450mm
- Weight of paper 80-450gsm (creasing), 80-250gsm (perforating)
- Width of Crease 0.5mm or 1.0mm
- Max. number of creases per sheet 15
- Min./Max. Distance between creases 2mm/1000mm
- Speed 2500 A4 sheets/hour
- Dimensions L1250mm x W675mm x H520mm
- Weight 90kg
- Voltage/Frequency 230V/50Hz
